

CPA AUSTRALIA

ONE OF THE WORLD'S LARGEST ACCOUNTING BODIES

CPA Australia wanted to initiate a similar standard across their offices and approached Pro AV Solutions to complete the Sydney office.

As part of the upgrade, Pro AV Solutions were refreshing the video conferencing boardroom, the large training space, and a collaborative meeting room along with the touch panels. The client from the first meeting made it very clear that they expected a standardised solution. Therefore the touch panels and their functionality had to reflect their other offices.

The boardroom is a traditional video conferencing boardroom with large display so all participants can clearly see and hear all conference calls. The large training spaces featured fully controllable projection and a microphone lectern for large training sessions.

We also refreshed the separate collaborative

The aim of the project was standardisation. The AV deployed at CPA is simple to interact with and operate, and follow the standard that CPA offices around the country now follow.

meeting room which features a Microsoft Surface Hub. This room makes it easy for staff to communicate and collaborate with their interstate colleagues. The complex and detailed audio visual systems met the brief of the client in terms of the functionality of the space.
