

UNITED CO

THOUGHTFULLY-DESIGNED CO-WORKING SPACE

situated in iconic Smith Street, Melbourne, United Co provides flexibility and support to local start-up business and encourages the work-life journey.

The Kahlon Group was seeking redesigning the shared workspace environment by implementing AV and collaboration technology as differentiating factor in a highly competitive co-working market.

The events space has been fitted out with a large-format video wall for immersive display and presentation capabilities, supported by integrated audio & presentation microphones.

Operation of the space is simplified through Crestron infrastructure and custom touch control interface running on a docked iPad.

Multiple spaces have been enabled with digital displays, interactive whiteboards and unified communications kits to allow for

The key objective was to enhance communication and collaboration spaces by fitting out the latest and most suitable technology, to support the needs of new generations.

seamless collaboration locally and with remote participants.

WePresent wireless presentation systems integrated with Sony Bravia commercial displays deliver a simple, cable-free

presentation experience. This means that management staff don't need to worry about interoperability for the plethora of computing and device types in use across the facility. Simple on-screen instructions allow first time users and guests to present with ease in seconds.

In the boardroom, integrated camera and audio systems allow attendees to connect their own laptop and leverage the unified communications client of their choice [i.e. Skype for Business, Zoom, Google Hangouts, WebEx Teams].

This solution provides both complete flexibility for the differing needs of members and a premium quality video conferencing experience.

The training spaces have been fitted out with the SMART Board Pro series interactive display, allowing for live digital whiteboarding which can be broadcast in the cloud, as well as touch enabled presentations and document annotation on a stunning 75-inch 4k display.
