

ELECTRICITY SOLUTIONS COMPANY

ADELAIDE, SOUTH AUSTRALIA

Our client delivers safe, affordable and reliable solutions to power homes, businesses and the economy.

As part of the brief, our client was seeking cutting-edge AV technology for two state-of-the-art, mission critical control and data centres. These spaces required

equipment to facilitate effective large-scale monitoring solutions. The aim was to create a highly durable, high-quality and future-proof solution to ensure the system's effectiveness over a long life. Focusing on this end goal, the proposed solution required technology suitable for a 24-hour mission critical control room.

The aim was to create a highly durable, high-quality and future-proof solution to ensure the system's effectiveness

ELECTRICITY SOLUTIONS COMPANY

ADELAIDE, SOUTH AUSTRALIA

Based off the brief, the Pro AV Solutions team leveraged state-of-the-art LED technology to design and install a custom, wall-mounted 1.2mm pixel pitch screen, 6m wide by 2m high.

As a result, the small pixel pitch ensures content to be displayed at extraordinary accuracy. Additionally, this singular LED screen provides the advantage of a consistent display area across its entire span.
