TRINITY COLLEGE

SOUTH AUSTRALIA

Trinity College embarked on a transformative capital works project to create an Innovation and Creativity School of Excellence that will provide a platform to develop and embrace 21st Century education principles.

The Trinity Innovation and Creativity School was designed to enable the evolution of teaching and learning outcomes.

With the Trinity College vision at its core Trinity has also established a relationship with University of South Australia to develop co-curricular program. This will evolve over time however it is recognised there will be significant synergies between the University's SMART School and Trinity's Innovation and Creativity School. The School is embracing and appreciates that technology, in various forms is going to be a

fundamental enabler to facilitate a focus on enhancing pedagogy that will deliver transferable capabilities and enterprise skills to its students.

The environment will foster the development of transitional skills by encouraging enquiry-based learning, guided exploration, and enhanced collaboration, both on and off campus.

TRINITY COLLEGE
SOUTH AUSTRALIA

The classroom is the place where engaging, insightful interaction begins. AV has an innate ability to inspire communication and create a fantastic environment for discussion, debate and learning. Our integrated audio visual solutions have revolutionised educational environments and delivered accessible, collaborative technologies and unique learning experiences that students and teachers love. As part of this unique and exciting development for the College, a powerful, integrated audio visual solution was key to ensure Trinity set itself apart with a pioneering educational environment and all the technological resources to deliver a dynamic teaching experience to Trinity students that will accommodate forthcoming technological advances and evolving needs.

Flexibility
The individual Innovation and Create Spaces allows for flexible configurations for a plethora of uses. All the spaces to be connected and integrated into the one platform.

Connectivity
This Innovative and Creativity facility enables various opportunities for digital connectivity

Collaboration
All users are able to work together in teams around tables or other defined areas and individuals should be able to share digital content from their personal devices with their teams or groups.
