

COMMONWEALTH BANK OF AUSTRALIA

SOUTH EVELEIGH

The Commonwealth Bank's (CBA) new offices at South Eveleigh will occupy 93,000m² across the three new buildings for their 10,000 employees, housing their technology and digital teams, and Innovation Labs of the Future.

Delivering a pre-eminent state-of-the-art work, innovation, and lifestyle destination for both workers and the local community was central to the revitalisation of South Eveleigh. As part of the brief, Pro AV Solutions was commissioned to introduce new age workspace technologies that allowed for simple operation resulting in an exceptional user experience. The solutions had to not only be designed to fit within the agile working culture of the Commonwealth Bank, they also needed to be scalable enough to meet the standards of the bank's future expansion plans.

The aim of the bank was to create an intuitive and pleasant user experience while reaching new levels of innovation.

Pro AV Solutions worked with the design specification provided by CBA's trusted AV design consultants Innova-Tech to deliver a functional, agile, user friendly work environment. Under the guidance of Mirvac, Pro AV deployed and delivered over 1,200 spaces across both Foundry and Axle over a 3-year period.

COMMONWEALTH BANK OF AUSTRALIA

SOUTH EVELEIGH

The Innovation Lab is a big feature of the new office as multi-joinable spaces become a place for external parties to flex their creative muscles and workshop forward thinking ideas with their peers. Designed for a myriad of uses, the key is flexibility enabling seamless collaboration and expression.

The Atrium is the town hall space for large corporate announcements. It was key that this space was flexible for these situations but also reliable and easy to use.

Both the Axle and Foundry building impress from the moment you enter the foyer with incredible use of LED on show. At Axle, there is an Atrium Lift LED wall that blows you away. Standing at 31m tall from the finished floor on the ground to the roof on Level 8, this Vuepix 2.5mm pixel pitch LED makes a stand as the innovative and inviting space the customer was after.

Collaboration spaces are not just easy to use but incredibly warm and inviting, flexible, and agile. Every space is VC enabled so remote participants can easily join.
